Art Unit: 2823

Applicant's election with traverse of claims 1, 15, and 16, Species I, in the reply filed on 08-04-05 is acknowledged. The traversal is on the ground(s) that the searches are the same, and because of issues related to compact prosecution and public interest. This is not found persuasive because valid reasons for restriction have been stated and applicant does not address these reasons for restriction.

The requirement is still deemed proper and is therefore made FINAL.

Claims 1-13, 15, and 16, are objected to because of the following informalities:

The term "temporal" in claims 1, 15, and 16, is a relative term, which renders the claims indefinite. The term "temporal" is not defined by the claims, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. If applicant intends a particular profile, it should be clearly recited.

In claim 2, line 2, "a" after "fabricating", and before "fixed layer by the method", should be replaced with --the--.

In claim 2, line 2, "a" after "the fixed layer having", should be replaced with --another--.

Appropriate correction is required.

Claims 2-13 would be allowable if rewritten to overcome the objection(s) set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Art Unit: 2823

Claims 1, 15, and 16, would be allowable if rewritten or amended to overcome the objection(s) set forth in this Office action.
